SERIES

Model 04-39PH in Brushed Nickel

MODEL 30PH/39PH PATCH HINGE DOOR

WaterFall's Patch Hinge Door brings excitement to semi-frameless doors and stall configurations. Hinges mount securely thru the glass and lock into the wall jamb for a clean exterior appearance simulating a much more expensive Heavy Glass installation. The Model 30PH includes adjustable jambs, acrylic sweep, 6" thru-the-glass pull handle and a magnetic latch. The glass panel closes against vinyl strips on both jambs and is held securely in place by the stainless magnet. Achieving a full 180 degree opening, the Model 30PH design meets minimum opening requirements not possible with conventional doors.
